

RESEARCH POSITION

We are looking for an outstanding and highly motivated Scientist to work on the AIRC-funded research project (from February 2021):

“Targeting IL-10 producing regulatory T-cells in cancer”

The ideal successful candidate should have experience with mouse cancer models, lymphocyte culture (both human and murine), flow cytometry and molecular biology techniques. The ideal candidate also should be available to work part of the time in Italy (Milan) and in Bellinzona (Switzerland).
